

FEATURE PRODUCTS
HEAVY VEHICLE LIGHTING

BUILT TO LAST

UNIVERSAL LIGHTING BY HELLA

Light is essential for both seeing and being seen. This is crucial for the heavy vehicle sector where professional drivers and vehicles travel long distances day and night. Rely on HELLA quality lighting for productivity while keeping vehicle operators and road users safe.

For over 120 years HELLA has been developing innovative lighting systems that provide optimal illumination, offering a higher level of driving comfort, increased productivity, reliability and safety.

With a comprehensive range of LED front, side and rear signal and marker lamps, driving lamps, work lamps and accessories HELLA products have been tried, tested and proven in the Australian and New Zealand road transport sector for over three decades.

HELLA products are manufactured using high quality, corrosion resistant materials that have been tested and proven to be ultra-durable in extreme environments and harsh conditions - that's why HELLA is the right partner for you.

In this brochure is a selection of universal lighting products designed for the heavy vehicle sector. For the complete product portfolio visit hella.com.au

HELLA New Zealand - Manufacturing products for Australia since 1973

With a reputation for innovation and an uncompromising approach to quality, HELLA New Zealand is regarded as a manufacturing centre of excellence within the global HELLA group.

Established in 1973, HELLA New Zealand began developing and manufacturing high quality, robust LED vehicle lighting products to meet the unique requirements and challenges of end users in Australia and New Zealand. A strong partnership soon formed between HELLA's Australian and New Zealand operations, and for almost 50 years many joint projects that began by creating new and innovative solutions to the challenges of their local markets have resulted in products that have gone on to achieve global success.

Technology Leaders

HELLA New Zealand was one of the pioneers of LED lighting, with its research and development recognising the enormous advantages of LED technology for commercial vehicle, mining and marine lighting applications in the early 1990s. Over the last two decades, some of HELLA's most innovative LED lighting products have originated from HELLA New Zealand's design and manufacturing plant in Auckland and its electronics assembly plant in Waihi.

Today, HELLA New Zealand has world-class expertise in LED lighting technology. Its dedicated in-house electronic and optical design engineers develop innovative products with smart electronics that provide enhanced features, class-leading reliability and energy efficiency. High quality, corrosion resistant materials that stand the test of time are used for chassis, lenses and mounts to achieve high levels of impact resistance and durability, such as optical nylon, which is far stronger than conventional plastics.

The Auckland facilities cover some 7500m² and boast state of the art, highly automated manufacturing capabilities. The Waihi electronics plant, purpose built in 2007, boasts the latest automated, high precision assembly systems that place 70,000 LEDs onto circuit boards each day. Huge investment has been made in state of the art, computer-controlled moulding machines that enable extremely precise moulding tolerances to be achieved, down to as little as plus or minus .02mm.

In accordance with HELLA's commitment to environmental sustainability, the Auckland factory uses 100 per cent renewable energy and 95 per cent of waste material generated during the moulding process gets recycled into packing trays and glue tubes, and for purging machines between different types of plastics.

Fit and Forget - by Design

HELLA New Zealand's fit and forget – by design philosophy reduces ownership costs for fleets with maintenance-free lighting solutions, such as the DuraLED® series of LED marker and signal lamps which provide maximum visibility and an unrivalled service life that's supported by an industry-leading lifetime warranty.

Originally conceived in 1996 and trialled for the very first time in 1998, DuraLED® marker and signal lamps revolutionised the market by eliminating vehicle downtime as a result of globe failures, dust or water ingress, or damage caused by debris and, in doing so, reducing costs for fleet operators.

Ongoing product upgrades, including design changes, the introduction of Grilamid® lenses for improved impact-resistance and the latest electronics, have enabled DuraLED® to remain at the forefront of the market.

Quality Assured

Every product that leaves HELLA New Zealand's facilities is individually tested, and every order line is QA inspected. On-site testing facilities subject products to extremes of temperature, intense UV light, exposure to chemicals, and in humid and salt-laden conditions to ensure that they perform under stresses that greatly exceed those of most real-world situations.

A Lifetime of Service

With over 20 years of strenuous testing, continuous improvement and proven reliability in use on the roads of Australia and New Zealand, HELLA Australia is proud to stand by the unique DuraLED® lifetime warranty*, which warrants every DuraLED® product to last the economic life of the vehicle they were first installed on.

However, in the unlikely event that you should experience a confirmed warranty-related problem with DuraLED®, our commitment to your satisfaction ensures that HELLA will either repair or replace the product or refund the purchase price.

**This warranty does not cover claim/s as a result of normal wear and tear, any modifications, alterations, non-compliance of assembly, service and operating instructions and/or any unfit or improper use. Repair, replacement or refund is at HELLA's sole discretion.*

01 GRILAMID® LENS

Toughness against impact.
UV & chemical resistant.
Will not fade or embrittle.

03 FIT & FORGET

Expertly designed and
precision manufactured.

02 LEDS

High quality LEDs &
the latest electronic
technology.

04 RELIABILITY

Continuous improvement
& strenuous testing for an
ultra long operating life.

DURALED® **BUILT TO LAST**

HELLA's growing range of DuraLED® lamps, incorporating the latest LED technology, have proven to be the superior economic and environmental choice for transport operators in Australia. DuraLED® has a track record to last the distance. The first DuraLED® lamps were supplied in 1998, some 20 years ago and are still in use today.

Fully sealed against dust and moisture to International Protection Standards IP 6K6/IP 6K7, and compliant with current ADR (Australian Design Rules). As a result, these lamps are approved for use in Australia and New Zealand.

Once again following market demand, we now offer a range of selected models of DuraLED® lamps with moulded-in-Deutsch (DT) Connectors.

HELLA's innovative DuraLED® lamps are designed for use on trucks, buses, caravans, emergency vehicles and speciality applications.

DuraLED® SIGNAL LAMPS

LIFETIME WARRANTY

HELLA Australia offers a Lifetime Warranty for all automotive LED based lighting products that carry the DuraLED® brand.

Whenever you see this DuraLED® logo you will have the confidence to install products that are designed and warranted to last the economic life of the vehicle they were first installed on.

DuraLED® Stop/Rear Position Lamp with Night Light
- Vertical Mount

RALLYE 4000 LED DRIVING LAMP

Sophisticated electronics for minimal radio frequency interference (ADR and ECE R10 compliant)

Patent protected design

Heat sink for effective thermal management

Water resistant

Energy efficient

Vibration resistant and environmental protection for extreme conditions

Power supply 9-32 V, overvoltage and reverse polarity protection

Rallye 4000 LED Driving Lamp

1F8 016 560-101 (1366LED) Satin Black, Spread Beam

1F8 016 560-111 (1365LED) Satin Black, Pencil Beam

RALLYE 4000 LED PRODUCT FEATURES

- Driving Lamp with state-of-the-art LED-technology and trend-setting look
- Clear white (5900K) LED light
- Unique front mounted heat sink with large effective area for effective cooling
- Resistant to dirt build-up and reduction in cooling performance
- High-quality, robust full metal housing and zinc plated die-cast mounting bracket
- Tool-free precision tilt angle adjustment
- 3 Year Warranty
- Available in Spread Beam and Pencil Beam
- Weight 2.7kg
- Multi-Voltage: suitable for 12V DC and 24V DC electrical supplies
- Power consumption and input current:
 - 2700 mA / 32.4 W at 12V DC
 - 1350 mA / 32.4 W at 24V DC

For upright mounting.
Tilt adjustment + / - 7°

LIGHT DISTRIBUTION

1) Rallye 4000 LED Spread Beam – Range is over 800 m at 1 Lux

2) Rallye 4000 LED Pencil Beam – Range is over 1.3 km at 1 Lux

The light distribution shows two lamps in operation.

SPARE PARTS & ACCESSORIES

Replaceable LED-insert with polycarbonate lens available*

1F8 241 430-011 Insert Spread Beam
1F8 241 449-011 Insert Pencil Beam

*Suitable for upgrading existing Rallye 3003 and 4000 series halogen driving lamps.

K-LED® REBELUTION

THE NEXT GENERATION OF LED BEACONS

- The revolutionary, flat design does not require a classic dome
- The LED technology used to produce this compact warning signal has been patented by HELLA for the field of warning lamps
- This latest development enables maximum performance with a minimalistic design and will definitely become the eye-catching highlight on your vehicle

Innovation and change – that's what the K-LED® Reblution beacon stands for. Light has been refashioned, and technology developed further. With its minimalist light exit area this revolutionary design is setting new standards in the beacon market.

The most striking feature of the K-LED® Reblution is its unique and unconventional design. It manages without a classical dome and impresses with its discreet, modern styling. At only 6cm in height and 14.9cm in diameter, the beacon is extremely compact in size, making it ideal for vehicles subject to height restrictions.

The K-LED® Reblution is suitable as a 1:1 replacement for all other permanently installed versions of HELLA beacons. The identical hole spacing means it is quick to replace.

	H1-LLDP2	LONG LIFE		12V	55 Watt	P14.5s
	H1-LL-24VDP2	LONG LIFE 24V		24V	70 Watt	P14.5s

Blue

BLUE GLOBES – WHITER (UP TO 4200°K)

These globes come close to emulating the colour of a Xenon HID lamp. The high colour temperature of the Blue globes creates the crisp white light which provides illumination that is conspicuous while being easy on the eye.

LongLife

LONGLIFE (LL) - UP TO TWICE THE LIFE

LongLife (LL) globes are increasing in popularity for applications where drivers are using headlamps during the day. Many new vehicles now come equipped with LongLife globes as a standard fitment. The globes will provide safe and legal light performance and can be rated at twice or greater the service life of standard globes.

NOTE: All globes are supplied as twin packs.
