

HEAVY TRANSPORT LIGHTING

LED LIGHTING FOR COMMERCIAL VEHICLES

ALL-ROUND SATISFACTION

UNIVERSAL LIGHTING BY HELLA

Light is essential to both seeing and being seen. This is especially important for the heavy transport sector with staff and vehicles travelling long distances, working day and night, they need to rely on quality lighting to stay productive while keeping operators and all road users safe.

For over 120 years HELLA has been developing innovative lighting systems that provide optimal illumination, offering a higher level of driving comfort, increasing work efficiency, reliability and safety.

With a comprehensive range of LED front, side and rear signal and marker lamps, driving lights, work lamps and accessories HELLA products have been designed, tested and proven in the Australian and New Zealand road transport sector for over three decades.

HELLA products are manufactured using high quality, corrosion resistant materials that have been tested and proven to be ultra-durable in extreme environments and harsh conditions - that's why HELLA is just the right partner for you.

In this brochure is a selection of universal lighting products designed for the heavy transport sector. For the complete product portfolio visit www.hella.co.nz

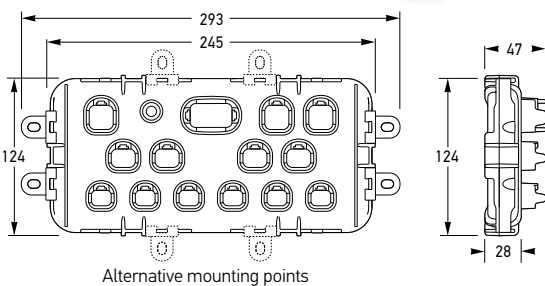

LED LAMP DISTRIBUTION BOX

A REVOLUTION IN LED LIGHTING FOR TRAILERS

8JE 233 496-001
LED Lamp Distribution Box
(Plugs and Cables not included)

Looking for a simple and reliable way to connect lighting to your trailer harness?

HELLA's revolutionary LED Lamp Distribution Box is the quick connect, easy trouble shooting solution for fitting LED lamps to heavy trailers and custom vehicles.

The LED Lamp Distribution Box is designed with integrated Deutsch DT connector sockets that provide easy and reliable lamp connection. Internal electronics isolate individual circuits and reduce lamp outage to ensure a long life and reliable lamp operation. A completely sealed housing and durable materials provide protection against water, dust and high pressure/steam jet cleaning.

K-LED REBELUTION

THE NEXT GENERATION OF LED BEACONS

- The revolutionary, flat design does not require a classic dome
- The LED technology used to produce this compact warning signal has been patented by HELLA for the field of warning lights
- This latest development enables maximum performance with a minimalistic design and will definitely become the eye-catching highlight on your vehicle

Innovation and change – that's what the K-LED Rebelution beacon stands for. Light has been refashioned, and technology developed further. With its minimalist light exit area this revolutionary design is setting new standards in the beacon market.

The most striking feature of the K-LED Rebelution is its unique and unconventional design. It manages without a classical dome and impresses with its discreet, futuristic styling. At only 60mm in height and 149mm in diameter, the beacon is extremely compact in size, making it ideal for vehicles subject to a height restriction.

The K-LED Rebelution is suitable as a 1:1 replacement for all other permanently installed versions of HELLA beacons. The identical hole spacing means it is quick to replace.
